EDUCATION

BE in Computer Science Engineering

Thakur College of Engineering and Technology Current
SGPA - 7.6

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | Zenlynx Technologies

September 2025 - November 2025

- Contributed to LMS development and implemented **RBAC** for 3+ user roles, improving security and admin efficiency.
- Integrated PhonePe payment gateway for secure and reliable transactions.
- Debugged and optimized platform features, fixing **15+ UI and API issues** to improve stability and security.
- Redesigned landing page with revamped design, and supporting full cross-device responsiveness and performance optimization.

Tech Intern | Chrysalis Technosoft

March 2025 - June 2025

- Spearheaded development on the candidate-side dashboard of jobs247.co.in, boosting the platform's responsiveness based on Google Lighthouse metrics by **20%**.
- Deployed and debugged features for job applications and tracking using **RESTful APIs** and **JavaScript**, implementing **responsive UI design**, **NoSQL** database handling and **Version Control (Git)**.
- Applied skills in an **Agile** environment, resolving technical issues and improving code quality, cutting delivery time by **10%**.

ML Intern | Suvidha Foundation

December 2024 - January 2025

- Extracted data using BeautifulSoup & spaCy, extracting data with high accuracy (**~80%**)
- Hands-on experience with building end-to-end ML pipelines from ingestion to training.
- Practical exposure to RAG (Retrieval-Augmented Generation) based applications,

PROJECTS

Nirva - Your Virtual AI Therapist

- A virtual ADHD therapist using MEAN Stack, ElevenLabs, Gemini APIs, and n8n for real-time, voice-based interactions.
- Supported **100+** voice commands with highly **context-aware** and adaptive conversational responses.
- Integrated RAG-based workflows, significantly improving response accuracy by **35%** and personalization quality.
- Optimized scalability and latency, efficiently handling 1K+ daily queries with robust and reliable API performance.

IRA - Takes you from Idea to Impact.

- An AI-powered GTM companion that automates market research and generates actionable insights for new business ideas.
- Analyzes **50+ articles** and reports per query to create concise viability reports with idea scoring and trend summaries.
- Automates the **lead pipeline** by discovering 3–5 relevant LinkedIn professionals per idea, building lead lists, sending connection requests, and delivering email updates within seconds.

CareerCrate - Job Portal

- Engineered a MERN stack (MongoDB, Express, React, Node.js) job portal with job search, filtering, application tracking, and bulk posting features supporting **500+ listings**.
- Designed and integrated RESTful APIs for job posting, application tracking, and reducing request latency by **~20%**.
- Created a responsive, high-performance frontend, improving user experience and increasing page load speed by **~15%**.
- Enhanced full-stack development skills, optimizing databases to reduce query time by **20%**, and implemented authentication

SKILLS

- Programming & Scripting:* Python, Java, JavaScript, TypeScript, HTML, CSS
- Databases & Backend:* PostgreSQL, MySQL, MongoDB, Node.js, Express, REST APIs
- Frontend & Tools:* Angular, React, GitHub, Postman
- Others:* RESTful APIs, JSON Handling, Authentication (JWT , OAuth)

EXTRA / CO - CURRICULAR

- Smart India Hackathon: Top college team; contributed to solution design & implementation
- OSCILLATION Hackathon: Hardware track finalist; ML model & Arduino
- Research: Driver Fatigue Detection (ongoing); Smart Irrigation System (Multicon recognition)
- Leadership & Social Impact: Discipline Incharge (ZEPHYR Fest), SIH team lead; taught underprivileged children & led art workshops
- Sports: College Basketball & Tug of War Team (2023–Present)
